

Kamal Sharma

Data Analyst

Transforming raw data into actionable business insights through analytics, visualization, and stakeholder communication

Made with GAMMA

Technical Skills

Data & Analytics

SQL (MySQL, PostgreSQL), Python (Pandas, NumPy), Excel (Pivot Tables, VLOOKUP, Data Cleaning), EDA

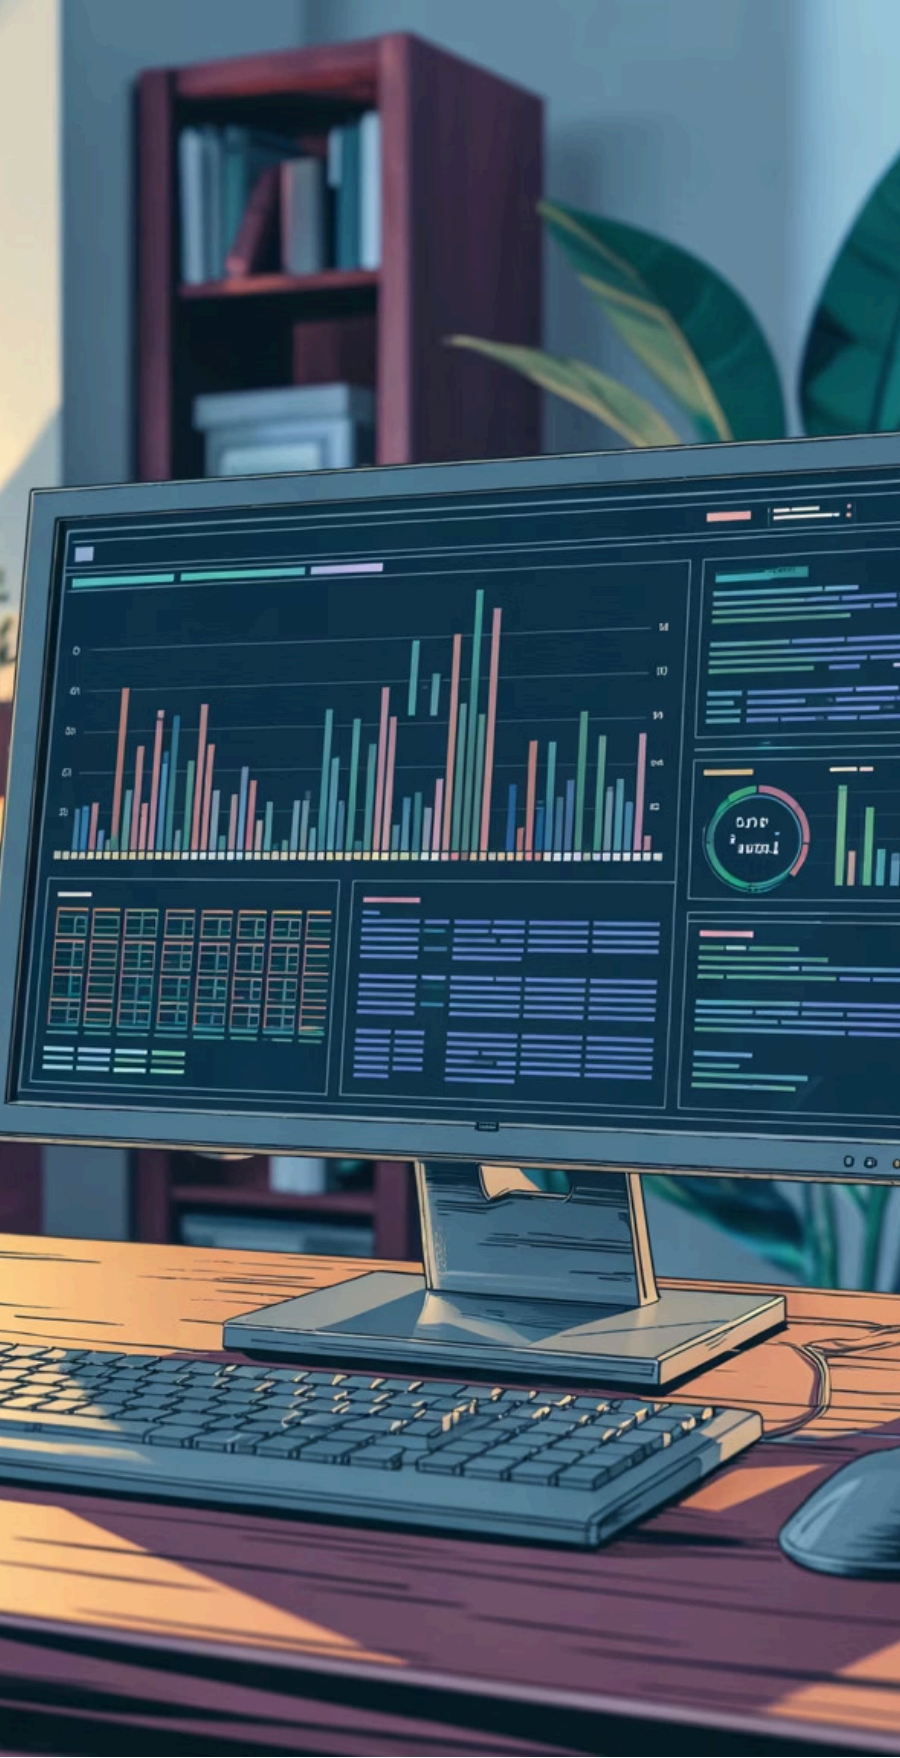

Visualization & BI

Power BI, Tableau, Dashboard Design, KPI Reporting, Data Storytelling

Other Tools

Git, Jira, REST APIs, Database Query Optimization

Data Analyst

Self-Directed (Course + Project Work) | Apr 2025 – Present

01

Exploratory Data Analysis

End-to-end EDA on 5,000-customer retail e-commerce dataset using Python (Pandas, NumPy)

02

SQL Query Development

12+ business questions covering revenue by category, discount effectiveness, customer segmentation, and seasonal demand patterns

03

Interactive Dashboard

Two-page Power BI dashboard with slicers for category, gender, discount, and subscription status

04

Business Insights

Key finding: discounted customers spend 20% more on average (\$219 vs \$183)

Key Achievement

20% Higher Spend

Discounted customers spend \$219 vs \$183 for non-discounted

Identified and communicated a key business insight from e-commerce data analysis, translating raw data into a concrete, actionable recommendation for marketing strategy.

Built interactive Power BI dashboard presenting KPIs including total revenue (\$994K), average spend, top products, and customer distribution to simulate stakeholder reporting workflow.

Software Engineer

KocharTech | Jul 2022 – Apr 2025

Enterprise Dashboards

Built and maintained data-driven reporting dashboards for 10+ Fortune 200 clients including Samsung, Lenovo, and OnePlus

Stakeholder Communication

Communicated data findings to enterprise stakeholders across 3+ workforce management modules used by 50,000+ employees globally

Performance Optimization

Optimized database schemas and queries with connection pooling, achieving 15% improvement in query performance

Client Support

Resolved 95% of client-reported data and dashboard issues within tight deadlines

Enterprise Impact

10+

Fortune 200 Clients

Samsung, Lenovo, OnePlus

50K+

Global Employees

Across 3+ workforce modules

15%

Performance Gain

Query optimization achieved

95%

Issue Resolution

Within tight deadlines

Customer Insights Analytics

Python • SQL • Power BI | github.com/kamal-1233/Customer-Insights-Analytics

Project Scope

End-to-end analysis on 5,000-customer e-commerce dataset: Python for data cleaning, SQL Server for business queries, and Power BI for interactive dashboard covering revenue trends, customer segmentation, discount impact, and seasonal demand.

Key Findings

Segmented customers into New (561), Returning (1,354), and Loyal (3,085) groups using SQL window functions. Identified that repeat buyers skew heavily toward active subscriptions.

Education

B.Sc. Information Technology

S.L. Bawa D.A.V. College (G.N.D.U.), Batala, Punjab

May 2020 | CGPA: 7.6

Core Competencies

Exploratory Data Analysis

Handling missing values with domain-specific logic, removing duplicates, and standardizing columns for downstream analysis

Business Insights

Translating raw data into concrete, actionable recommendations for marketing and retention strategies

Data Storytelling

Presenting KPIs and findings to stakeholders through interactive dashboards and week-over-week performance metrics
